

# SCALEBITZ

---

## 1/4-Scale WWI Vickers Machine Gun (British)

---

### Part Number SBZ041000

The finishing touch to any number of British / Allied aircraft from World War I this resilient scale model of the famous Vickers machine gun builds quickly and easily and features dual mounting points for added security.

<b>Scale:</b>	1/4
<b>Length:</b>	290mm / 11.4"
<b>Width:</b>	31mm
<b>Material:</b>	Plastic (3D printed)
<b>Application:</b>	Forward firing; mount singly or as a pair; use on scale and sport-scale WWI aircraft.

### Assembly Notes

1. Trim any remaining flash from the parts.
2. Glue the two halves of the body together.
3. Glue the cocking lever on the right-hand side at the rear.
4. Glue the muzzle to the front of the barrel.
5. Glue the barrel to the main body.
6. Glue the gun sight to the front of the barrel.
7. Paint your machine gun matt black. For best effect sand some pencil lead into a small pile then rub the powder all over the gun to give a burnished gun metal appearance. The back half of the ammo belt should be a brass colour and the bullets silver. Finally, seal the finish using a clear spray lacquer.
