EXTREME 4S POWER

Raptor R 4X4 Ultimate uses the extreme Velineon 540XL brushless motor found in the Maxx monster truck, backed by the VXL-4s speed control with built-in telemetry and selectable 6.0 or 7.4-volt BEC. With 4s LiPo power on tap, Raptor R Ultimate defies the laws of physics as it rockets its way to 60 mph and beyond with unrelenting acceleration.

ULTIMATE UPGRADES

Raptor R Ultimate comes fully loaded with aluminium caster and steering blocks, axle carriers, and GTR shocks to give Raptor R Ultimate the brute strength required for extreme driving. Extreme HD driveshafts are beefed up with extra material and overbuilt construction to form a nearly indestructible driveline.

INCLUDED WIRELESS MODULE

A Traxxas Link Wireless Module comes standard on Raptor R 4X4 Ultimate along with factory-installed telemetry sensors to unlock the full potential of the TQi transmitter. Adjust the transmitter's settings on the fly and record real-time telemetry data like speed, RPM, and battery voltage on your mobile device using the free Traxxas Link app.

- Officially licensed Ford F-150 Raptor R body
- Moulded replica scale details
- Clipless body mounting system
- LED lighting in front and rear bumpers
- VXL-4s waterproof electronic speed control
- TQi 2.4GHz high output radio system
