SELF-RIGHTING SECURITY

Self righting is more than a convenience feature, it's an all-access pass to exploit Spartan's full 50+ mph fury. Boaters of all skill levels will enjoy the confidence-inspiring security of self righting. There's no need to back off the throttle or tone down the action. Just pin the throttle and Spartan SR takes care of the rest.

- NEW Self-righting flood chamber
- NEW Sealed clipless hatch
- NEW Centralized battery positioning
- NEW Heavy-duty flex shaft
- NEW Removable electronics tray
- 50+mph VXL-6s Marine power system
- High performance 36" deep-V hull
- Waterproof electronics
- TQi 2.4GHz radio with TSM
- Traxxas Stability Management (TSM)
- High-torque waterproof 2056 servo
- Anodized aluminium rudder and drive strut
- Stainless steel turn fins, trim tabs and hex hardware
- Efficient water cooling system
- Quick-release motor collet

RAZOR-SHARP HANDLING

Spartan SR's deep-V ABS hull carefully balances speed with agility for a truly thrilling driving experience. A new electronics layout and battery tray drastically improve handling precision by concentrating the weight inboard along the centerline. The result is razor-sharp handling, no-lift turns, and superior high-speed stability.

50+ MPH SPEED

Grab a fistful of throttle and Spartan SR's VXL-6s Marine power system transforms 22+ volts of LiPo power into furious acceleration. The high-performance prop digs in, getting the boat on plane quickly and efficiently as it slices through the water at speeds of 50 mph and beyond.
