BL-2S BRUSHLESS POWER

The BL-2s brushless power system delivers more speed, quicker acceleration, and a more responsive throttle. Improved efficiency, high-speed ball bearings, and an internal cooling fan allow Slash Modified to run battery after battery for all-day race sessions. With no brushes to wear out, the BL-2s 3300 kV motor can last the entire racing season with minimal maintenance.

REPLICA HOOSIER TYRES

Replica Hoosier Angle Block tyres are mounted to graphite gray "steelie" wheels for an authentic race-prepped look. The tyres are molded in a special rubber compound that balances durability and traction for consistent performance lap after lap. The large tread block design utilizes aggressive siping for maximum grip and predictable handling at the limit.

CLIPLESS RACE BODY

Slash Modified comes Ready-To-Race with a clipless body that requires no assembly and exceeds even the best custom designs. A heavily reinforced internal cage utilizes robust top and side bracing to ward off crash damage and protect the rear tyres. Traxxas clipless technology holds the body firmly in place from start to finish with quick and easy removal on the pit bench.

- Realistic oval-track body
- Extreme heavy duty driveshafts
- Hex hardware
- Removable differential
- Low-CG chassis
- Adjustable battery hold-down
- Aluminium GTR shocks
- Waterproof receiver box
- 3-channel receiver with fail-safe security
- High torque steering servo
- Chassis nerf bars
- Heavy duty suspension arms
- Dual-bellcrank steering
- Adjustable steel turnbuckles
- Extreme suspension components
- Torque control slipper clutch
- All-metal internal gears
- Rubber-sealed ball bearings
- Sealed beveled gear differential
- Precision transmission case
