NEW HIGH-ANGLE STEERING

4-Tec Drift delivers big sideways drifts and quick transitions thanks to its steering geometry and powerful TSM Drift Mode. TSM compares steering angle with driver input and seamlessly applies just enough assistance to maintain the desired drift. 4-Tec Drift also includes an optional high-angle steering kit to boost steering angle to 75° for drivers seeking maximum throw.

CUSTOMISABLE DRIFT MODES

4-Tec Drift lets you choose between three customisable drift modes. Innovative TSM Drift technology replaces old-fashioned drift gyros with smooth precise control that can be fine tuned with the Traxxas Link app. New drivers can drift like a pro without specialised knowledge or skills, and advanced enthusiasts will enjoy the refined controls and smooth performance.

Electronic Handbrake

INCLUDES WIRELESS MODULE

A Traxxas Link Wireless Module is included to harness the full potential of 4-Tec Drift's powerful TSM drift modes. Use the full-colour graphical interface to personalise the 3-channel TQi radio's settings and unlock its advanced tuning features. Tap the handbrake button on the side to initiate rotation and begin your drift.
