1/10 SCALE POWER SYSTEM

The BL-2s Brushless Power System is already proven to deliver extreme power and wheel-standing torque in Traxxas 1/10 scale vehicles. Installed in Mini Maxx, BL-2s power punches well above its weight for lightning-quick acceleration and 30+ mph top speed.

MAXX CHASSIS TECHNOLOGY

Mini Maxx fits in a backpack but it's built to withstand all the bumps and bruises of the full-size world. Just one look at the rigid, unified structure and you know it's a Maxx. A Maxx chassis is always engineered for ultimate strength, and Mini Maxx packs it all up in a supremely compact design.

LONG-TRAVEL SUSPENSION

1/10 scale Ultra Shocks and a long-travel independent suspension deliver WideMaxx handling and performance in a compact package. Mini Maxx's beefy long travel suspension delivers superior strength and refined damping control to maintain composure over the roughest terrain.

- 2s 3500mAh LiPo battery included
- 2-amp USB-C charger included
- Clipless body mount system
- 1/10 scale 4X4 drivetrain
- Direct-drive (no transmission)
- Chassis absorbs and distributes impact energy
- Battery is protected deep in the chassis
- 1/10 scale 2056 waterproof high-torque servo
- Cam-style servo saver
- Heavy-duty, double-shear suspension arms
- Full size 1/10 scale oil-filled Ultra Shocks
- Tough energy absorbing bumpers
- 2.4 inch black multi-spoke wheels
- 4 inch Sledgehammer tyres with foam inserts
- TQ 2.4 GHz transmitter
- 30+ mph with included 2s 3500mAh LiPo battery
- Rust-resistant black oxide coated hex hardware
- Sealed ball bearings
