**1/10 SCALE BRUSHLESS POWER**

The Velineon VXL-3s brushless power system is the heart of Traxxas' fastest and most powerful 1/10 scale vehicles. For the first time ever, this extreme 11.1-volt powerplant now comes installed in a compact platform. The result is astonishing acceleration, 55+ mph speed, and wheel-standing power at any rpm.

**MAXX CHASSIS TECHNOLOGY**

Mini XRT is the newest truck to use the revolutionary chassis design pioneered in Mini Maxx. Perfectly sized to fit into a backpack, Mini XRT transforms full-scale performance and durability into a supremely compact chassis. Just one look at the rigid, unified structure and you know it's built Maxx tough.

**WIDEMAXX SUSPENSION**

Mini XRT relies on proven WideMaxx suspension design to deliver sure-footed grip and laser-focused handling. Mini XRT sits low and wide for hard cornering and maximum stability at speed. The long-travel suspension delivers refined damping control to maintain composure over the roughest terrain.

- 2s 3500mAh LiPo battery included
- 2-amp USB-C charger included
- Clipless body mount system
- 1/10 scale 4X4 drivetrain
- Direct-drive (no transmission)
- Chassis absorbs and distributes impact energy
- High-torque, metal-gear 2075X servo
- Cam-operated servo saver
- Heavy-duty, double-shear suspension arms
- Full size 1/10 scale oil-filled Ultra Shocks
- New graphite grey mini XRT wheels
- Gravix tyres with foam inserts
- Thick centre carcass resists ballooning
- TQi 2.4 GHz radio system with TSM
- 40+ mph with included 2s 3500mAh LiPo battery
- 55+ mph with optional 3s LiPo battery. **No gear changes required!**
- Rust-resistant black oxide coated hex hardware
- Sealed ball bearings
