BL-2S POWER SYSTEM

Stampede's waterproof BL-2s brushless power system ramps up the fun with more torque, faster acceleration, and less maintenance than comparable brushed power systems. The BL-2s is a model of efficiency and refinement, offering more power than before with the safety and convenience that only Traxxas can deliver.

EXTREME HEAVY DUTY UPGRADES

Extreme Heavy Duty components come factory-installed on Stampede for game-changing durability. Key drivetrain and suspension components are beefed-up with extra material for ultimate strength. From HD suspension arms to the upgraded axles, Stampede sets a new standard for durability for your off-road adventures.

CLIPLESS BODY MOUNTING

Stampede's clipless body holds firm no matter how rough the action gets. Heavy duty latches grip the body tightly, but release in just seconds for fast battery swaps. This convenient hidden latching system replaces traditional body clips with reinforced panels to maintain body integrity and resist pull-through damage.

- Moulded body reinforcements
- Adjustable wheelie bar
- Oil-filled Ultra shocks
- Extreme heavy-duty driveshafts
- Waterproof electronics
- 3-channel receiver with fail-safe security
- TQ 2.4 GHz transmitter
- Monster 4" ground clearance
- Talon all-terrain tyres
- Easy access battery compartment
- High-torque waterproof steering servo
- Heavy-duty suspension arms
- Hex hardware
- LED-ready front bumper
- Durable one-piece camber links
- Extreme heavy duty suspension components
- Metal gear Magnum 272 transmission
- Torque-control slipper clutch
- Steel-composite planetary gear differential
- Rubber-sealed ball bearings
