EXTREME POWER AND SPEED

Brushless power delivers the muscle you want with the reliability you expect. The VXL-6s Marine electronic speed control is built for true 6S LiPo power. Cooling water is routed through the speed control case and then into a sealed motor jacket that allows cooling water to flow against the motor for maximum possible heat transfer. The M41 keeps its cool, run after run.

- 30+mph with two 7.4V LiPo packs, 50+mph on 6s LiPo all-out! (batteries sold separately)
- 40" widebody catamaran hull for incredible high-speed performance
- Water-cooled, waterproof VXL-6s Marine ESC
- Traxxas high-current connectors (patented)
- Velineon 540 XL high-output brushless motor with highflow water-cooling jacket
- Quick-release Power Module
- Waterproof electronics
- Blue-anodized aluminium rudder support
- Blue-anodized aluminium rudder
- Blue-anodized aluminium drive strut
- Stainless steel turn fins, trim tabs and hex hardware
- TQi 2.4 GHz transmitter
- Traxxas Stability Management (TSM)
- Waterproof high-torque steering servo
- Sleek design with factory-applied graphics
- Ready-to-race

STAINLESS STEEL HARDWARE

M41 uses corrosion-resistant stainless-steel and nickel-plated hex hardware throughout for good looks, easy maintenance, and lasting performance. Convenient hex heads make the M41 a pleasure to be kept maintained.

100% FULLY ASSEMBLED

M41 is fully assembled with a TQi 2.4 GHz radio system, Velineon brushless power system, applied graphics, and detailed instructions. Traxxas goes the extra mile to ensure that your RC experience is fun, easy, and fast!
