BRUSHLESS

SLASH VXL
1/10 2WD SHORT COURSE TRUCK
Velineon brushless motor (3500kV)
VXL-3s ESC
NiMH-3S LiPo (not included)

£459.99

Announced 28th Jan, 2024
 Available 28th Jan, 2024

58276-74
 FOX Edition / Green / Red

CLIPLESS BODY MOUNTING

The Slash's innovative clipless body features secure mounting with quick and easy removal. No posts, no clips—just drop the body onto the chassis and snap it into place for a secure hold. When it's time to change the battery, depress the tabs under the wheel wells and lift up to access the chassis in just seconds.

All-Metal Internal Gears

PRO SERIES TRANSMISSION

The Magnum 272R uses a new low-profile housing with a rock-solid 3.2 mm aluminium motor plate. A hardened steel top shaft and all-metal gears send power to a sealed, silicone-filled 4-gear differential for maximum traction. A removable panel gives you easy access to the differential for tuning with different viscosity fluids.

VELINEON BRUSHLESS POWER

The Velineon brushless motor and electronic speed control deliver the ultimate in efficiency, speed, and run time. With the Slash VXL, your battery selection determines your speed and skill level. Velineon accepts a wide range of batteries, including powerful 3-cell LiPo packs. These packs pump out over 11 volts of power for intense, skill level 5 speeds beyond 65 mph!

- Pre-painted clipless race replica body
- Magnum 272R transmission
- Traxxas stability management
- TQi 2.4 GHz transmitter and receiver
- Waterproof electronics
- Digital high-torque waterproof steering servo
- Dual-bellcrank steering with integrated servo saver
- Long-wheelbase fibre-composite chassis
- Scale front and rear tube-style bumpers
- Torque-Control slipper clutch system
- External gear cover with easy slipper access
- Heavy-duty telescoping U-joint driveshafts and yokes
- Heavy-duty steel turnbuckles and captured rod ends
- Fully adjustable Ultra Shocks with X-ring technology
- 60+ mph with 3s LiPo and optional gearing (sold separately)
- Efficient rubber-sealed ball bearings
- Rust-resistant black oxide coated hex hardware
- 100% Fully assembled and Ready-To-Race
