£1,244.99

77036-4

Fully assembled X-Maxx MT Chassis

LEGACY OF TOUGHNESS

Traxxas set a new standard for RC monster trucks with the release of the original X-Maxx. Since then, X-Maxx has only grown stronger and more powerful with each generation. The new X-Monster incorporates the latest and greatest X-Truck upgrades to create the strongest X-Maxx chassis and driveline ever offered.

MONSTER TRUCK WHEELS & TYRES

All new chevron-pattern monster truck tyres give the X-Monster a livelier feel with improved grip and greater control. The huge 8.6" tyres are made from an ultra-soft compound for incredible traction with internal belting to reduce ballooning. Replica white monster truck wheels feature military-style hubs for an authentic scale appearance.

CHOOSE YOUR BODY (sold separately)

Pair the X-Maxx MT Chassis with a replica Ford F-150, Chevrolet C/K, or BIGFOOT No. 8 body (sold separately). Each body features a full-length reinforced body cage for maximum rigidity. Already have a custom-painted X-Maxx body? The X-Maxx MT Chassis also accepts existing X-Maxx clipless bodies!

- Choose from several clipless monster truck bodies (sold separately)
- Traxxas stability management
