THE MAXX EXPERIENCE

Maxx turns up the dial on fun with even more of what you crave. Maxx doubles down on strength and durability with a longer and wider stance for greater stability to match its blistering 60+ mph performance. Bury the throttle, fly through corners, and let Maxx turn your wildest full-throttle dreams into reality.

60+ MPH MAXX MUSCLE

Traxxas Velineon brushless power hits hard with massive 4s punch for an awe-inspiring 60+ mph top speed and effortless wheelies on demand. The high-output 540XL motor features a beefy 5 mm shaft, aluminium heat sink, and a powerful fan. Of course it's all fully protected with Traxxas' innovative waterproofing.

TRAXXAS TOUGH

Maxx is overbuilt with components found on much larger and heavier vehicles to withstand extreme punishment and intense driving action. The Maxx chassis absorbs and dissipates impact energy across the entire structure for superior strength. Threaded-aluminium GT-Maxx shocks with oversized shafts soak up massive jumps for high-flying fun at every turn.

- 60+ MPH with optional gearing and single 4s LiPo battery (sold separately)
- Traxxas stability management
- TQi 2.4 GHz high output radio system
- Traxxas Link enabled
- Clipless body mount system
- Full-time shaft-driven 4-wheel drive
- Secure motor mounting system
- Modular composite chassis
- Driveline sealed in the chassis to keep dirt out
- Battery tray accepts 6700 mAh 4s LiPo battery
- Large-scale high-output steering servo
- WideMaxx double-shear suspension arms
- Fixed, high-strength camber and toe links
- GT-Maxx shocks
- Wheelie bar with integrated carry handle
- 2.8" wheels with Sledgehammer extreme tyres
- Rust-resistant black oxide coated hex hardware
- Sealed ball bearings
