HIGH TRAIL EDITION

The factory-installed Long Arm Lift Kit raises K10 High Trail Edition over an inch taller for superior ground clearance. Large 2.2" mag wheels and Canyon Trail tyres tame even the most technical trails to extend your scale adventures farther than ever before.

EXTENDED 336MM WHEELBASE

K10's steel frame rails extend the wheelbase out to 336 mm to capture the pickup's real-world proportions perfectly. A longer wheelbase also translates into greater climbing stability and a smoother, more stable ride over rough terrain.

CLIPLESS BODY MOUNTING

K10's clipless body holds tight on the trail but releases in just seconds to access the chassis. This hidden latching system adds a new level of convenience and scale realism to the TRX-4 by removing traditional body clips which can interrupt the body's clean lines.

- Factory-installed long arm lift kit
- Clipless 1979 Chevrolet K10 Pickup body
- Chrome scale details
- LED-ready light assemblies
- 2.2" chrome mag wheels
- S1 compound Canyon Trail tyres
- TQi 2.4GHz radio system with cruise control
