ENGINEERED FOR 6S POWER

Sledge is the only truck in this class with a properly sized, 6s-capable driveline. Bigger gears. More steel. Basically bombproof. Sledge smashes the status quo to be the new standard for extreme 6s durability.

SUPERIOR CHASSIS STRENGTH

Sledge is engineered to have the strongest chassis in the class. The triangulated chassis structure integrates a deep-formed aluminium plate with a multi-point composite truss system and the patent-pending full-length T-Bar. Built on a solid foundation, Sledge is strongest where it matters most.

BELTED TYRES

Sledge's belted Sledgehammer tyres deliver game-changing stability and control whether you're slinging mud or setting speed records. The wide, open-block tread design won't clog up with dirt or debris and the lightweight belting maintains the tyre's shape for a larger contact patch, more grip, and responsive handling at any speed.

- New belted Sledgehammer off-road tyres
- New 15/52 stock gearing
- New graphics & colour options
- New colour-matched aluminium parts
- 22+ volts of fine tuned 6s power
- Traxxas Stability Management
- TQi 2.4GHz high output radio system
- Heavy-duty steel driveshafts
- Fixed gear mesh system
- Large scale steel ring and pinion gears
- Oil-filled GT-Maxx shocks
- Performance-optimized geometry
- Low-CG design for improved handling
- High-throw bellcrank steering
- Heavy-duty servo saver with aluminium posts
- Powerful 2275 metal gear servo & metal servo horn
