OVER 35% ADDITIONAL
CENTER GROUND CLEARANCE

LONG ARM LIFT KIT

High Trail edition's Factory Installed Long Arm Lift Kit and larger tires raise the centre ground clearance over 35% for a dramatic lifted stance. Revised shock mounts and extended links ensure the truck maintains its carefully-tuned suspension geometry for peak performance on challenging terrain.

0.2" Taller (4.9mm)

HIGH TRAIL
BAJA PRO XS

STANDARD
TRX-4M CANYON TRAIL™

NEW LARGER 2.4 TYRES

Larger 2.4 Mickey Thompson Baja Pro XS replicate the full size tyre's aggressive tread pattern and fill out the High Trail Edition's wheel wells for an authentic "lifted truck" look. Sticky compound rubber and trail-tuned foam inserts give extra "bite" for superior traction on the trail.

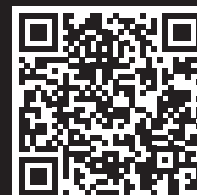

EXTENDED WHEELBASE

The High Trail Edition's steel frame rails extend the wheelbase out to 162mm to capture the pickup's real-world proportions perfectly. A longer wheelbase also translates into greater climbing stability and a smoother, more stable ride over rough terrain.

6.1" (156mm) Standard Wheelbase
6.4" (162mm) K10 Wheelbase

- Licensed 1979 Chevrolet K10 ABS body
