

JP Side Servo Mount

An Ideal solution to mounting a remote servo

The JP Side Servo Mount is a great solution to mounting a servo in an area with limited room or accessibility.

There are many nylon servo mounts available but as most will know, Nylon does not always bond very well and vibration can cause them to come loose!

The JP Side Mount can be glued or screwed to suitable surfaces. They are made from High-Grade 3mm ply and so are very durable.

SPECIFICATIONS

3mm High-Grade plywood

Suitable for normal and high powered servos

To suit Mini servo sizes

Servo bay – 34 x 17mm

Weight – 4.7g

ASSEMBLY

The JP Servo Side Mount can be assembled and install very quickly.

- Press out all the parts and dry assemble so it looks like the image attached.
- When happy that all parts fit together, pull apart ready for gluing.
- Glue all the parts where they contact each other and re-assemble
- Leave to dry. Drying time will vary depending on the type of glue used. (always go by the manufacturer's drying times)
