FUEL CADDY

Petrol / Jet Fuel / Glow Fuel / Smoke Fuel

Product No. JPDA0001 / JPDA0002

CONTENTS

- 1x Fuel Can
- 3x Tygon Tubing (150mm, 100mm, 60mm)
- 1x Prolux Hand Pump
- 1x Recoil Tubing
- 1x Filter
- 1x Filler Tube
- 1x Plywood Mount (2 pieces)
- 2x Cable Tie

Please check you have all items before you start.

INSTRUCTIONS

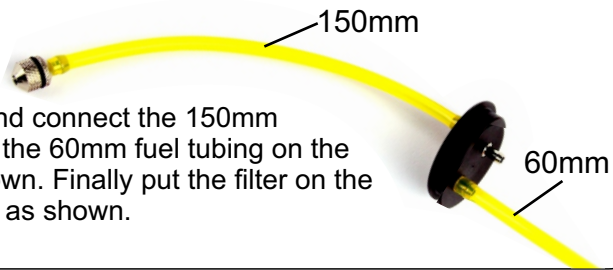

STEP 1

Glue the two pump mount plates as shown together with 5min or 30min Epoxy.

STEP 2

Disassemble the fuel cap and connect the 150mm fuel tubing as shown, place the 60mm fuel tubing on the other side of the cap as shown. Finally put the filter on the end of the 150mm fuel tube as shown.

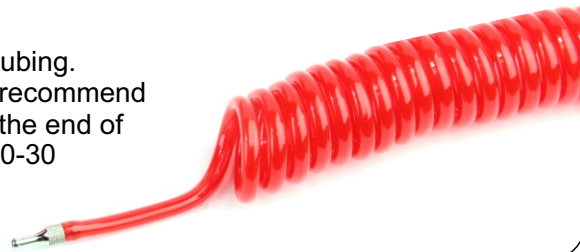

STEP 3

Re-assemble the cap as shown

STEP 4

Insert the filler tube to the recoil tubing. If you find it difficult to insert, we recommend softening the tube by immersing the end of the tube in boiling hot water for 20-30 seconds to help.

STEP 5

Insert the other end of the recoil tubing into the pump along with the 100mm fuel tubing.

STEP 6

Assemble the pump to the mounting plates as shown using the two cable ties.

STEP 7

Place the fuel pump bracket over the neck of the fuel can and screw the fuel cap on.

ATTENTION: Please ensure the seal is in place between the cap and the neck. Once in place attach the 100mm fuel tube from the pump to the other nipple on the fuel cap.

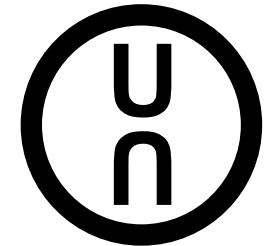

STEP 8

Always connect as shown when not in use.

When the pump is not in use always connect the recoil tubing back to the vent pipe as shown to stop any fumes or leaking. When filling always make sure the vent pipe is left to vent so as not to cause a vacuum.

WARNING: when in use this product becomes highly flammable.
Do not smoke
Do not store in direct sunlight
Do not overfill
Keep away from source of ignition
Ensure cap is fully tight before use
